

## S-Shape Template Instructions

The S-Shape Template is great for quick and easy block and border designs.

SYMBOL GUIDE	
	ruler foot
	start
	stop and needle down
	back stitching

### **\*Note:**

These tools are designed for machine quilting (aka ruler quilting). Before you start, please make sure you have the correct foot on your machine to use templates (aka rulers). The dimensions of these tools are designed with the ½” round “ruler” foot in mind. This means the foot is ½” wide from outside edge to outside edge and it is “thick” or “tall” walled. The regular foot on the Juki longarm is currently also the Juki ruler foot. For the TL machines, the ruler foot is #40166729. If you have any questions about the foot on your machine, please contact your Juki dealer.

### **Notes/Tips:**

When using templates/rulers to quilt around, you will be stitching ½” larger (the width of your foot) when stitching completely around the template, or ¼” wider if only using a portion of the template (the distance from your needle to the outer edge of your foot). If using templates/rulers on a machine that moves (stand-up or frame), be sure to have the ruler base attached to your machine. You may need to start with drawn/chalked guidelines on your quilt if there is no seam where you want the quilting to be placed. Make sure your needle will stop in the “needle down” position. Lower your feed dogs if you are on a Home Machine.

## SIMPLE BLOCK DESIGN I

Start with the ruler foot at the center point of your guidelines. Align the S-Shape's printed line with the vertical center line as shown and the tip butted up against the ruler foot. Stitch Completely around the template. Rotate the template to the 45° line and again align center lines and tip of the template to the ruler foot. Stitch completely around the template. Continue to rotate the template six more times; stitching around the template a total of eight times.

Completed Design

## SIMPLE BORDER DESIGN I

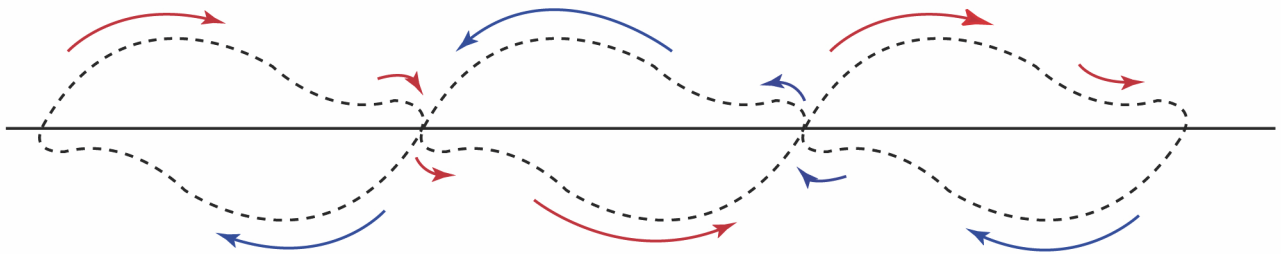

Align the S-Shape template with both points touching a horizontal line. Stitch from point A to B, stitching only half of the shape.

Slide template along the horizontal line butting tip of template against the ruler foot. Continue stitching around the bottom of the template.

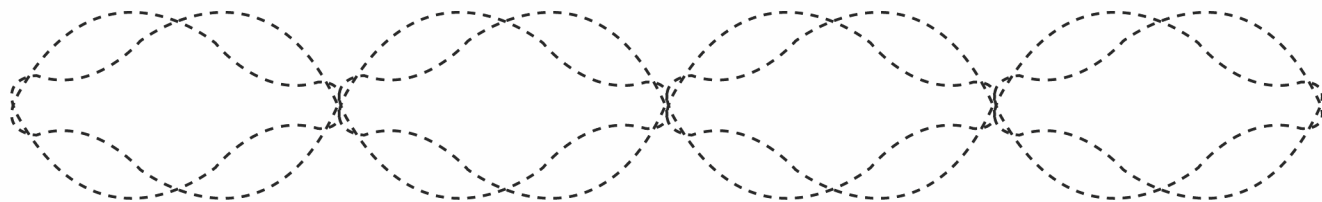

Continue moving and stitching 1/2 of the template. When you have reached the desired length of your design, reverse direction; moving the template and stitching back to the beginning.
